

Brand: Ranger

Model: RH-50PL

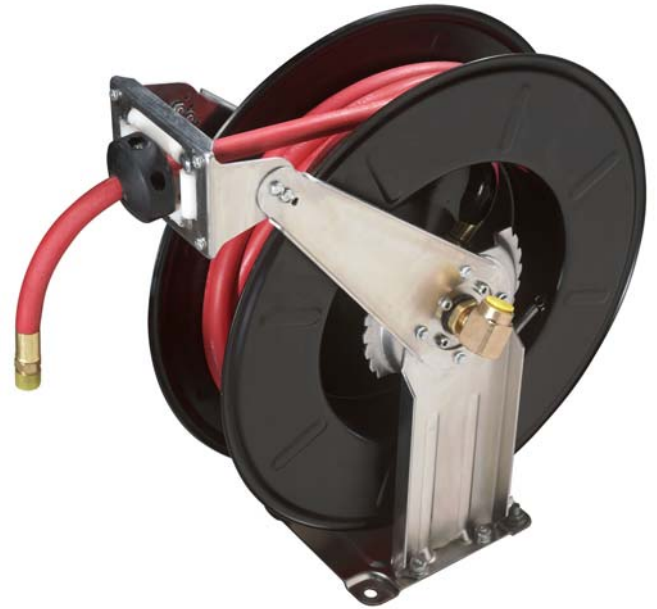

Description: Dual Support, Spring Rewind Hose Reel and 50' / 300 psi Hose

Ranger Hose Reels, Time-Tested Superior Design

Ranger spring-driven hose reels have a long history of dependability and trouble-free performance. Their compact, space-saving design and heavy-duty construction make them very rugged and virtually indestructible. The RH-50PL is an especially durable reel, further reinforced by a dual support leg base, guide arms and axle. Offering everything you look for in a reel, it unrolls the included 50' hose when you need it and conveniently rewinds it without hassle when you don't. It's easy to see why Ranger hose reels are the preferred choice among automotive service industry professionals: time-tested proven components, superior design and quality craftsmanship.
